

A lab that develops humans into Forward Thinkers and Active Shapers.

BE Human Labs uses research, innovation and transformation to build people's awareness, capability, connection and contribution, so more of them shape what comes next instead of absorbing it.

Why we exist

A few people are shaping the future. Everyone else is absorbing it.

The gap isn't about talent. It's about who has been prepared to see what is coming and act on it.

2 in 5

people have had any AI training, though two in three already use AI regularly.

University of Melbourne and KPMG, 48,000 people in 47 countries, 2025

55%

of Indian IT firms saw entry-level employment fall after adopting AI. At mid level, only 25% did.

ICRIER, survey of 651 IT firms in 10 Indian cities, 2026

How the lab works

Research, innovation and transformation, run as one engine.

01 Research

Learns what is changing, in humans, society, technology and the future.

02 Innovation

Builds a response: new ideas, models and tools grounded in what research found.

03 Transformation

Changes how people live, for individuals and for groups.

What it transforms

Four dimensions, developed together.

Awareness

Who am I, and how am I connected to the world around me?

Capability

What can I do, and how can I do it better?

Connection

Who can I do this with?

Contribution

What will I actually change, and will I see it through?

Where it matters

Every Active Shaper widens the circle.

Human

The individual

Society

How people live and work together

Humanity

The larger human journey

Through what

Four offerings, each doing something the others can't.

People

guide change

Products

scale it

Programs

structure it

Systems

sustain it

Let's shape what comes next.

For a conversation, a pilot, or to bring this to your team.
